PERSONAL PROFILE

Full-stack web developer based in Flensburg, Germany with experience in Front Desk Reception, Documenting patient's internal/external lab tests, hands-on experience in the pathology laboratory, Records Management, and MERN stack as a developer. I use React Native, Mongoose, MERN on top of basic HTML, CSS, SCSS / SASS, and Javascript. I develop both on the Front and Back -end, but my focus is front as I can use my existing knowledge about user flow and user journey to develop efficient and easy-to-use programs.

PROJECTS

CareerFoundry

Jan 2022 - Feb 2022

Chat Application

- Developed a chat app for mobile devices using React Native. The app will provide users with a chat interface and options to share images and their location.
- The app is developed using Expo. Chat conversations are stored in Google Firestore Database.

CareerFoundry

Sep 2021 - Nov 2021

myFlix Application

- Developed a client-side application developed in React, based on its existing server-side code using MERN stack.
- The API is tested in Postman and deployed to Heroku.
